

MINISTRY OF HOUSING, TRANSPORT AND ENVIRONMENT

Huravee Building, Ameer Ahmed Magu,
Malé (20114), Republic of Maldives

Announcement

The government of Maldives seeks a party or parties to establish a comprehensive public transport system throughout the islands of Maldives. This transport network should connect all the inhabited islands. The archipelago has been divided into 7 regions; each region covers 20 to 50 interchange/terminal nodes. Type of vessels, numbers, sizes, frequency and fare will be issues of concern to the government. The investor may be allowed to invest in one or more regions.

The government intends to attract investors to establish and run this public transportation network, through allowing the investor to enter into the booming tourist industry of the country. The successful party to establish and run the transport network will be awarded beachfront real estate for commercial uses such as guest houses, motels or industrial developments. The government intends to reduce levies in order to allow investors to establish and operate a viable transport network.
